Product keys are required for the installation of Autodesk single-user individual products. For example, if you have an **Autodesk Industry Collection** and you wish to install one of the applications within it, i.e. **AutoCAD 2019**, then this point product requires the Product Key **001K1**.

Please note if you are using an **Autodesk Design Suite**, as such **Building Design Suite Premium 2019** but installing **AutoCAD 2019** it requires product key **765K1**. The same version of AutoCAD is in both software packages but they use different Product Keys.

For applications belonging to a Collection, use the individual Product Keys.

For applications belonging to a Design Suite, use the one/same Product Key for your Design Suite for all applications.

Note: Please ensure you are using the correct product key for the Autodesk product and version you are installing. Entering an incorrect product key will result in activation errors for that product.
